### Objective

The 9th Advanced Lasers and Photon Sources Conference (ALPS2020) will be held on April 20-23, 2020 at PACIFICO Yokohama, Japan in the framework of the Optics & Photonics International Congress 2020 (OPIC2020), which consists of fifteen optics-related scientific conferences. In ALPS2020, we intend to discuss **the recent topics of progress in lasers and photonic science**. Specially, we expect broad research works of laser sources covering the fundamental researches to industrial applications.

**ALPS2020 student paper award** will be given for the outstanding student paper presentations in ALPS2020.

### Scope of Topics

- Novel optical materials/ structure and applications
- High average power lasers and applications
- High peak power lasers, high pulse energy lasers and applications
- Novel solid state/ fiber/ diode lasers and applications
- Short wavelength light sources and applications
- Terahertz devices, nonlinear optics and applications
- Novel optical devices, metamaterials, structure and applications
- Optical devices and techniques for bio and medical applications
- Optical frequency combs/ frequency stabilized lasers and applications
- Quantum optics and their applications

The 9th Advanced Lasers and Photon Sources Conference (ALPS2020) is collocated with **OPIC2020** and Optics & Photonics International Exhibition (OPIE'20). 850 papers were presented in the last OPIC2019 and more than 400 companies exhibited in the last exhibition OPIE'19. Anyone who is registered to ALPS2020 is admitted to the other conferences of OPIC2020 and the exhibition OPIE'20. Visit <http://opicon.jp/conferences/> to find other conferences.
