

Call for Paper

Laser Solutions for Space and the Earth 2020

Conference

April 20-24, 2020 Pacifico Yokohama, Yokohama, Japan

Objectives

The aim of “Laser Solutions for Space and the Earth” is to discuss the application of emerging laser technologies to solve various problems for sustainable developments of space and the earth. We consider “Agri-Photonics”, “Space Technology”, “Infrastructure” and “Active Remote Sensing” as the featured topics of the year 2020.

Topics

- Agri-Photonics
 - Smart agriculture
 - Laser plant factory
 - Laser sense organ
- Infrastructure
 - Nondestructive Testing
 - Laser-Induced Breakdown Spectroscopy (LIBS)
- Active Remote Sensing
 - Extreme Condition
 - Industrial Application
- Space Technology
 - Laser Debris deorbit
 - UV imaging
