### **A. Light Sources and Components**

Visible lasers, LED, solid-state light sources, phosphor, wavelength conversion materials, for displays and automotive applications. Optoelectronic components, such as spatial light modulators, high-speed scanners, MEMS, projection components, display drivers and interfaces are also included.

### **B. Imaging / Lighting**

Physical display unit (projection, holography, light-field), Sensing and Imaging technologies (3D imaging by scanning, ghost imaging, imaging algorithm), Image acquisition by new technologies (Raman/ Nonlinear scattering, Photoacoustic imaging PAI...). Illumination and lighting including LIFI. Imaging Evaluation and Image processing for speckle reduction. Color management and image quality control. Laser safety and standardization.

### **C. AI and DX analysis for Smart Systems**

Intelligent Display and IoT systems for smart society, which are integrated with other functional devices or technologies, such as AI analysis / control, digital transformation (DX), signal processing, various sensors (e.g., cameras, TOF and LiDAR), human interfaces, wired / wireless microwave / millimeter wave / optical communication devices or interfaces, or wired / wireless optical power supplies. Design, algorithm, or components particularly applied for the above smart systems are also included.

### **D. XR(AR, MR, VR) and Metaverse Technologies**

Metaverse platforms and related technologies such as AR (Augmented Reality), MR (Mixed Reality), and VR (Virtual Reality), XR technologies (relevant hardware, software and their applications): Those technologies expand human potential and have a great impact on life style as well as opening a new market.

### **E. Laser Applications for Moving Platforms**

Sensing applications used in various moving platforms, such as ToF based LiDAR, as well as FMCW LiDAR. Light-based vehicle-to-vehicle communication. Lighting/communication applications including headlights, rear lights, CASE, as well as other functional lighting devices. Applications involving both lighting and display include road surface projectors.
