About TILA-LIC

The Tiny Integrated Lasers and Laser Ignition Conference (TILA-LIC) is an international forum for discussions on various aspects of the ubiquitous sources and phenomena associated with highly intense laser pulses. TILA-LIC will offer to share information on sciences, technologies, and market related to Giant Micro-Photonics.

“Tiny Integrated Lasers”

Tiny Integrated Lasers refer to compact integration of highly intense laser devices and peripheral systems that enables ubiquitous operation of extraordinarily accurate measurements and control of extreme material phases.

“Giant Micro-Photonics”

Based on the recent photonic innovation called Giant Micro-Photonics, ubiquitous lasers symbolized by TILA that can be operated everywhere and anytime by everybody can become the door to promote the world to a new generation.
